

Dedication	I
Acknowledgment	II
Abstract	III
Contents	IV
List of figures	VI
List of tables	VII
Chapter 1	Introduction
1.1 Overview	2
1.2 Non-Renewable energy resources	2
1.3 Renewable energy	3
1.3.1 Basic forms of renewable energy	4
1.4 Energy Conversion	8
1.5 Solar Energy	9
1.5.1 Solar thermal energy	10
1.5.2 PV Systems	10
1.6 Thermal photovoltaic (PVT)	11
1.7 Literature Review	12
Chapter 2	PV & PV/T Systems
Photovoltaic Systems	16
2.1 Introduction	16
2.1.1 History of Photovoltaic	17
2.1.2 Photovoltaic Effect	18
2.1.3 Photovoltaic Cells	19
2.1.4 Traditional Made of PV Cell	21
- Steps of fabricating PV cell and how it produces electricity	22
2.1.5 PV Modules and Arrays	24
2.1.6 PV System Components	24
2.1.6.1 Power Inverter	24
2.1.6.2 Battery System	25
2.1.7 PV Systems	25
2.1.7.1 Grid-Connected Systems	26
2.1.7.2 Stand-Alone Systems	26
2.1.8 Scale of PV Systems	28
2.1.8.1 Residential	28
2.1.8.2 Commercial	28
2.1.8.3 Utility	29
2.1.9 Emerging PV Technologies	29
2.1.9.1 String / Ribbon Silicon	29
2.1.9.2 Amorphous Silicon / Thin-Film Technologies	29
2.1.9.3 GaAs: Gallium Arsenide	30
2.1.9.4 CdTe: Cadmium Telluride	30
2.1.9.5 CIS: Copper Indium Diselenide	30
2.1.9.6 CIGS: Copper Indium Gallium Diselenide	30
2.1.9.7 Multi-junction Technologies	30
2.1.10 Benefits and Limitations	31

Photovoltaic/Thermal Systems	32
2.2 Introduction	32
2.1.1 Definition of PV/T Collector	32
2.1.2 Module overview	33
2.1.10.1 Points of Attention	33
- Glazing	33
- Type of PV	33
2.1.10.2 Classification of PV/T Collectors	35
- PV/T liquid Collectors	35
- PV/T air collector	37
- Ventilated PV with Heat Recovery	39
- PV/T Concentrators	41
2.1.3 Relation between type of collector and type of demand	42
Chapter 3	Applications of PVT Systems
3.1 Introduction	44
3.2 Evaluation Method	45
3.3 Evaluated Hybrid Systems	46
3.3.1 PV Lighting Applications	46
3.3.2 Solar hot water system & space heating	48
3.3.3 Solar hot water system	48
3.3.4 PV façade	48
3.3.5 Indoor swimming pool	49
3.3.6 In- and outdoor swimming pool	50
3.3.7 Heat pump I	51
3.3.8 Heat pump II	51
3.3.9 Biomass dryer	52
Chapter 4	Performance analysis of PVT
4.1 Energy analysis	54
4.2 The Second Law of Thermodynamics	55
4.3 The dead state	57
4.4 The concept of Exergy	58
4.5 Exergy and Anergy	58
4.6 Exergy efficiency	60
4.7 ENERGY EFFICIENCY vs. EXERGY EFFICIENCY in short	61
4.8 Hybrid Photovoltaic-Thermal Module (I3A214-235P)	62
4.8.1 Properties	62
4.8.2 PV module: characteristics	63
4.8.3 Certifications and warranties	64
4.8.4 Physical characteristic	65
4.9 Photovoltaic - thermal system main components	66
References	67

List of figures

Figure	Page
1.1 Forms of renewable energy and non-renewable energy	3
1.2 Wave energy	4
1.3 Geothermal energy	4
1.4 Hydro-electric energy	5
1.5 Solar energy	5
1.6 Wind energy	6
1.7 Biomass energy	6
1.8 Tidal energy	7
1.9 Examples of energy conversion	8
1.10 Some PVT devices	11
2.1 A solar cell provides power to this traffic signal.	16
2.2 Image courtesy of NASA	18
2.3 The silicon Atom	19
2.4 Sunlight to Electricity	20
2.5 Types of PV cells	20
2.6 How PV cell produces electricity	21
2.7 Made of photovoltaic arrays	23
2.8 PV systems	27
2.9 Relative Scale Of Photovoltaic Systems	28
2.10 Construction of a PV/T Collector	32
2.11 Market share of PV technologies 2002 (figure from PV-NET roadmap)	34
2.12 PVT liquid collector	36
2.13 Cross-sections of some common PVT/w collector designs	37
2.14 PVT air collector	37
2.15 Longitudinal cross-sections of some common PVT/a collector designs	39
2.16 Different modes of ventilated PV glazing operation	40
2.17 Ventilated PV with heat recovery	40
2.18 PVT concentrator	41
3.1 Application of PVT	44
3.2 PV panels produced electric energy	45
3.3 PV lighting applications	46
3.4 Glazed PV/T water collector for tap water heating	48
3.5 Unglazed PV/T air collector as ventilated PV facade in an industrial building	49
3.6 Glazed PV/T water collector for pool heating	49
3.7 Unglazed PV/T water collector for pool heating	50
3.8 Photovoltaic with swimming pool	50
3.9 Unglazed PV/T air collector combined with a heat pump and heat recovery unit	51
3.10 Unglazed PV/T water collector combined with a heat pump and aquifer	52
3.11 Unglazed PV/T air collector for drying tulip bulbs	52
4.1 Energy flows across a physical system	54
4.2 Exergy and energy flows across a physical system	60
4.3 Energy , Exergy & Entropy	61
4.4 The module of PV/T	62
4.5 Parts of PVT module	63
4.6 Physical characteristic	65
4.7 Photovoltaic - thermal system main components	66

List of tables

T a b l e	P a g e
1.1 Yearly Solar Fluxes & Human Energy Consumption	10
2.1 Relation between type of collector and type of demand	42
3.1 Evaluation criteria	45
3.2 PV Lighting Application Matrix	47
4.1 Energy Efficiency vs. Exergy Efficiency	61
4.2 Physical characteristic	65
